## Professional experience

### Spacedock, Amsterdam, Netherlands

*CEO, Founder*

*November 2013 – present*

- Building a private, dedicated Docker index and registry, which eventually failed due to strong competition in the market
- Node.js and DevOps consulting

### YLD, London, United Kingdom (remotely from Amsterdam, Netherlands)

*Senior Consultant*

*March 2014 – June 2014*

- Node.js consulting
- Designing and contributing to YLD's own products

### Vigour.io, Amsterdam, Netherlands

*Senior Node.js Developer*

*November 2013 – March 2014*

- Architecting scalable WebSockets-based backend stack
- Creating monitoring and deployment architecture

### Nodejitsu Inc., New York City, NY, USA (remotely from Poznań, Poland)

*Senior DevOps Engineer*

*January 2012 – October 2013*

- Managing, planning and performing deployments
- Architecting Nodejitsu and OpsMezzo services
- Working with business and enterprise customers
- Writing system management, orchestration and provisioning software
- Handling emergencies
- R&D

*Support Engineer*

*October 2011 – January 2012*

- Handling support requests on IRC and Twitter
- Investigating and triaging issues with Nodejitsu cloud
- Maintaining open source software

## Skills

- Advanced knowledge of JavaScript (node.js) and C

- Knowledge of Go, C++, Python, Bash, Clojure, Rust and front-end development (HTML5, CSS3, JavaScript)
- Systems programming
- Systems engineering, including designing scalable, distributed systems
- Designing APIs and protocols
